Subject: Yucca Mountain,

Part of Records Package / Supplement / Correction

Dear Ms Hanlon,

I urge the DOE to recommend Yucca Mountain to President Bush as the national repository for high-level radioactive waste and spent fuel. We have spent much time and resource to study the issue and have identified a solution.

It is time to take action and move our nation forward in resolving the issue.

We have the technology to move materials and a suitable location for their storage.

Lets start dealing with this issue rather procrastinate and study it some more to find another suitable storage location!
